1

 Tab. 1:
M1
M2

4 x

2 x M1

2 x M2

Tagliare i 4 metri in dotazione alla misura M1 ed M2 riportate in tabella

2

2 x

M1 - M2

Inserire il metro tagliato in misura M1 nelle 2 cave della barra anteriore, portandolo fine a fine corsa.
Ripetere l'operazione per la barra posteriore con i metri tagliati in misura M2.

3

4 x

Prendere i 4 piedi dalla scatola, allentare la vite affinché i piedi possano entrare nella cava.
Prendere il primo piede ed inserirlo in cava facendo **ATTENZIONE** a non sormontare il metro precedentemente inserito, stringere con forza la vite del piede.
Ripetere l'operazione per tutti i 4 piedi ciascuno in una cava.

5 Nm

K1

5 Nm

K1pro

4

M1b - M2b

Inserire l'avanzo del metro tagliato (M1b per la barra anteriore ed M2b per la barra posteriore) per coprire la cava scoperta.

Ripetere l'operazione per tutte e 2 le barre.
Inserire, infine, i 4 tappi come indicato in figura.

5

 Tab. 1:
 G1-F1
 G2-F2

4 x

8x14

Assemblare le 4 GANASCINE come mostrato in figura, facendo **ATTENZIONE** a rispettare le misure riportate in tabella. Lasciare la parte inferiore della ganascina lasca.

6

8x50

4 x

Posizionare la barra anteriore e la barra posteriore sul tetto dell'autovettura. Fissare le ganascine ai 4 piedi facendo **ATTENZIONE** a non stringere completamente la vite.

7

 Tab. 1:
 T1
 T2

8

9

Stringere la vite superiore fino ad accompagnare la parte inferiore della ganascina al tetto. Stringere con forza la vite inferiore. Stringere con forza la vite superiore facendo **ATTENZIONE** a non spostare la centratura delle barre. Per ottenere il risultato corretto stringere le viti alternando il lato destro al lato sinistro in maniera uniforme.
